

CECW-EH

**DEPARTMENT OF THE ARMY
U.S. Army Corps of Engineers
Washington, DC 20314-1000**

EM 1110-2-1612

Manual
No. 1110-2-1612

30 April 1999

**Engineering and Design
ICE ENGINEERING**

Table of Contents

Subject	Paragraph	Page
Chapter 1		
Introduction		
Purpose	1-1	1-1
Applicability	1-2	1-2
Explanation of terms	1-3	1-2
Ice impacts on Corps activities	1-4	1-2
References	1-5	1-8

PART I: ICE PROPERTIES, PROCESSES, AND PROBLEM SOLUTIONS

Chapter 2		
Review of Ice Processes and Properties		
Introduction	2-1	2-1
Physical properties of ice and fresh water	2-2	2-1
Mechanical properties of freshwater ice	2-3	2-3
Frazil ice	2-4	2-7
Thermal ice growth	2-5	2-9
Dynamic ice cover formation	2-6	2-12
Ice cover breakup	2-7	2-13
References	2-8	2-15

Chapter 3		
Ice Control		
Introduction	3-1	3-1

<i>Section I. Mechanical Ice Control</i>		
Ice control using flexible structures	3-2	3-2
Ice control by rigid or semirigid structures	3-3	3-15
Ice control by structures built for other purposes	3-4	3-28
Ice control not using structures	3-5	3-35

<i>Section II. Thermal Ice Control</i>		
Design of air bubbler systems to suppress ice	3-6	3-35
Point-source bubbler system	3-7	3-39
Use of thermal effluents and warm water for ice control	3-8	3-40

Subject	Paragraph	Page
Effects on river ice of warm water releases	3-9	3-44
References	3-10	3-54

Chapter 4
Hydraulic Computations and Modeling of Ice-Covered Rivers

Introduction	4-1	4-1
<i>Section I. Modeling River Ice Covers</i>		
General	4-2	4-2
Modeling ice covers with known geometry	4-3	4-2
Modeling wide-river ice jams	4-4	4-3
Roughness of the ice accumulation	4-5	4-6
Limitations of ice modeling	4-6	4-6
<i>Section II. The ICETHK Model</i>		
General	4-7	4-8
Ice covers with known geometry	4-8	4-8
Equilibrium ice jam theory and ICETHK	4-9	4-8
Ice in overbank areas	4-10	4-9
Structure and operation of ICETHK	4-11	4-9
<i>Section III. The HEC-RAS Model</i>		
General	4-12	4-9
Ice covers with known geometry	4-13	4-11
Ice jam thickness calculation	4-14	4-12
Solution procedure	4-15	4-12
References	4-16	4-13

Chapter 5
Ice-Affected Stage-Frequency Analysis

Introduction	5-1	5-1
Ice effects on river stage and flooding	5-2	5-1
Data sources	5-3	5-2
Form of frequency analysis	5-4	5-3
Approaches for developing ranked data tabulations	5-5	5-5
Summary	5-6	5-11
References	5-7	5-11

Chapter 6
Ice Forces on Structures

Introduction	6-1	6-1
Main types of ice-structure interaction	6-2	6-1
Dynamic forces—general	6-3	6-2
Vertical piers or piles	6-4	6-2
Dynamic forces—inclined piers	6-5	6-5
Dynamic forces—conical towers	6-6	6-6
Transverse forces on piers	6-7	6-6

Subject	Paragraph	Page
Static force—thermal expansion	6-8	6-6
References	6-9	6-6

Chapter 7

Sediment Transport

Introduction	7-1	7-1
Sediment transport under ice	7-2	7-1
Effects of winter navigation	7-3	7-2
References	7-4	7-10

Chapter 8

Bearing Capacity of Floating Ice

Introduction	8-1	8-1
Bearing capacity of ice blocks	8-2	8-1
Bearing capacity of ice covers for loads of short duration	8-3	8-3
Experience values	8-4	8-3
Empirical methods	8-5	8-4
Method based on the theory of elastic plates	8-6	8-5
Bearing capacity of ice covers for loads of long duration	8-7	8-8
Other considerations	8-8	8-10
References	8-9	8-10

Chapter 9

Model Tests

General	9-1	9-1
Modeling broken ice	9-2	9-1
Modeling sheet ice	9-3	9-1
Model calibration	9-4	9-2
Model distortion	9-5	9-2
Considerations in choosing modeling	9-6	9-2
References	9-7	9-3

PART II: ICE JAMS AND MITIGATION MEASURES

Chapter 10

Ice Jam Flooding in the United States

General	10-1	10-1
Ice jam flooding	10-2	10-1
Ice jam flood losses	10-3	10-2
References	10-4	10-5

Chapter 11

An Ice Jam Primer

Review of ice types	11-1	11-1
Types of ice jams	11-2	11-2
Causes of ice jams	11-3	11-4
Predicting ice jams	11-4	11-5
References	11-5	11-5

Subject	Paragraph	Page
Chapter 12		
Ice Jam Mitigation Techniques		
Ice jam flood control	12-1	12-1
Types of mitigation measures	12-2	12-1
Selecting mitigation measures	12-3	12-2
Permanent measures	12-4	12-3
Advance measures	12-5	12-10
Emergency management for ice jam flooding	12-6	12-15
Emergency measures	12-7	12-16
Case studies	12-8	12-21
Conclusion	12-9	12-23
References	12-10	12-23
PART III: WINTER NAVIGATION ON INLAND WATERWAYS		
Chapter 13		
River Ice Management Study		
<i>Section I. Study Concept</i>		
General	13-1	13-1
Objectives	13-2	13-1
Elements	13-3	13-1
<i>Section II. Study Elements</i>		
River system definition	13-4	13-1
Ice problem identification	13-5	13-2
Ice forecasting	13-6	13-2
Structural solutions	13-7	13-3
Operational solutions	13-8	13-3
Recommended plan	13-9	13-4
Chapter 14		
River Ice Problem Identification		
Surveys needed	14-1	14-1
Hydrology and hydraulic studies	14-2	14-1
Identification of ice problems	14-3	14-2
Ice problems around navigation projects	14-4	14-3
Ice problems occurring between navigation projects	14-5	14-7
References	14-6	14-12
Chapter 15		
Ice Forecasting		
General	15-1	15-1
<i>Section I. Long-term water temperature forecasts</i>		
Objective	15-2	15-1
Model description	15-3	15-1

Subject	Paragraph	Page
Model operation	15-4	15-4
Model results	15-5	15-5
Model accuracy	15-6	15-5
<i>Section II. Mid-winter ice forecasts</i>		
Objectives	15-7	15-6
Forecast model description	15-8	15-7
Hydraulic model description	15-9	15-9
Thermal model description	15-10	15-10
Ice model description	15-11	15-12
System parameters	15-12	15-15
Physical parameters	15-13	15-16
Initial conditions	15-14	15-17
Boundary conditions	15-15	15-17
Model output	15-16	15-18
Model calibration	15-17	15-18
Model operation	15-18	15-19
Location of field measurement sites	15-19	15-19
Initial conditions generator	15-20	15-21
Boundary conditions generator	15-21	15-21
Modes of operation	15-22	15-22
Model results	15-23	15-22
References	15-24	15-25

Chapter 16**Ice-related Hydrometeorological Data Collection and Monitoring**

Introduction	16-1	16-1
--------------------	------	------

Section I. Numerical data

Near real-time data collection	16-2	16-1
DCP system	16-3	16-1
Water temperature measurements	16-4	16-3
GOES satellite—WRSC authorization	16-5	16-8
Direct ground readout station	16-6	16-8
Water Control Data System (WCDS)	16-7	16-8

Section II. Imagery

Introduction	16-8	16-9
Aerial photography by hand-held camera	16-9	16-9
Aerial videotapes	16-10	16-12
Ground-based video	16-11	16-16
References	16-12	16-17

Chapter 17**Navigation in Ice**

Introduction	17-1	17-1
Environment	17-2	17-1
Vessel shape	17-3	17-2

Subject	Paragraph	Page
Auxiliary icebreaking devices	17-4	17-2
Summary	17-5	17-3
References	17-6	17-7

Chapter 18
Structural Solutions for Navigation Projects

General	18-1	18-1
---------------	------	------

Section I. Floating Ice Dispersion

Introduction	18-2	18-1
High-flow air systems	18-3	18-1
Air system components	18-4	18-1
Effectiveness of the air systems	18-5	18-4
Design of a high-flow air system	18-6	18-5
Example	18-7	18-7
Flow Inducers	18-8	18-10

Section II. Ice Passage Through Dams

Introduction	18-9	18-11
Submergible tainter gates	18-10	18-12
Roller gates	18-11	18-12
Conventional tainter gates	18-12	18-12
Gate limitations in winter	18-13	18-12
Other ice passage schemes	18-14	18-14

Section III. Anti-icing and Deicing at Locks and Dams

Introduction	18-15	18-14
Electrical heating of lock and dam components	18-16	18-15
Providing electricity for heating to locks and dams	18-17	18-17
Mechanical removal of ice from lock walls	18-18	18-18
Surface treatments to reduce ice adhesion	18-19	18-20
References	18-20	18-22

Chapter 19
Operational Solutions

Section I. Vessel Scheduling or Convoying

Introduction	19-1	19-1
Operational choices	19-2	19-1
Transit scheduling or convoying	19-3	19-1

Section II. Operational Techniques at Locks and Dams

Introduction	19-4	19-2
Physical ice removal	19-5	19-2
Methods used at locks	19-6	19-4
Methods used at dams	19-7	19-5

Section III. Operational Use of Thermal Resources at Locks and Dams

Introduction	19-8	19-5
--------------------	------	------

Subject	Paragraph	Page
Man-made energy sources	19-9	19-5
Unconventional energy sources	19-10	19-5
References	19-11	19-7

**Appendix A
Glossary**

**Appendix B
Ice Jam Mitigation Case Studies**

**Appendix C
Typical River Ice Management Study**
